- SAP Excelius Dashboards
- Microsoft PowerPoint and Publisher

RECENT WORK EXPERIENCE

Quacera LLC

2000-Present

Owner/Advisor/Developer

Built a business from the ground up and introduced a new method for stock market visualization called the Quadrant Performance Momentum (QPM) Radar. The system is an animated display of performance and momentum parameters that provides daily trend reports and early warnings to institutions and individuals within a variety of different stock market related categories. The goal of the business is to assist investors in tracking money flows using proprietary visualizations of the price performance versus benchmark (as well as price momentum). Partnered with TSP Radar which applies the QPM Radar to the Thrift Savings Plan portfolios.
